CATEGORIES (CHECK ALL THAT APPLY)

DESIGN & ENGINEERING

- Laboratories and indoor air quality post pandemic
- Recruitment and retention – How work from home has affected effective laboratory design
- The built environment and resilience of materials
- Lessons learned in lab design from the pandemic
- Energy modeling considerations in a post-pandemic world
- Design challenges associated with pathogen spread in the lab environment
- Designing laboratories that will last. What is a resilient lab of the future?

OPERATIONS AND FACILITIES MANAGEMENT

- Design & operations – How they play a role in a building's climate, energy and health resilience
- Net zero solutions and carbon neutrality and how these affect resilience of labs
- Climate and resiliency – how will we adapt

PRODUCTS, TECHNOLOGY & ENERGY MANAGEMENT

- Measuring, Certifying and Monitoring features of the built environment
- To “Serve and Protect” – Systems and features that have been found to support increased IAQ in laboratories
- Innovative systems that support resilience
- Commissioning strategies that can affect resilience in a lab's life cycle
- Smart Building Technologies supporting resilience
- Products that define resilience
- Performance Improvements in the post-pandemic environment
